ENTERPRISE
SECURITY

If you're struggling with ransomware, suspected security incidents, or the removal of residual malware following a security inspection, experience PAGO professional threat detection and comprehensive response services powered by our MDR (Managed Detection and Response) platform.

Recognized as the 'Top Managed Security Services Provider in APJC 2024' by the global security media group Enterprise Security Media, PAGO cutting-edge technology can take your organization's cybersecurity to the next level.

Apply for our free service today and take the first step toward a safer business environment.

PAGO is committed to going beyond mere technical responses, aiming to build a robust security environment that fosters sustainable growth and stable operations for businesses.

Our Freemium Threat Detection, Response, and Cleaning Service is offered free of charge and can be easily applied for through a simple process. Seize the opportunity to address your security threats and establish a stable, secure business environment!

Contact us now at tech@pagonetworks.com, and let us help you find the solution to your organization's security challenges.

PAGO provides free Freemium threat detection, response, and cleaning services to help businesses effectively address cybersecurity threats and strengthen the security of their business environments.

PAGO goal is to enhance clients' security infrastructure, minimize cyber threats, and assist businesses in building a stable and secure operating environment.

[Target Audience and Overview]

PAGO Freemium Threat Detection, Response, and Cleaning Service is not limited to existing clients but is available to businesses vulnerable to cyber threats. Companies meeting the following criteria are eligible for PAGO free services:

- **Victims of ransomware:** Businesses that have already been targeted by ransomware attacks.
- **Suspected security incidents:** Organizations showing signs of cyberattacks.
- **Post-audit malware cleanup:** Businesses requiring the removal of residual malware in existing systems after a security inspection.

[Service Details]

Threat Detection and Cleaning

- Real-time detection and cleaning of threats present in the client's infrastructure.
- Detailed analysis and removal of both known and unknown threats.

Support for Various Security Solutions

- Comprehensive threat detection and response through security solutions such as EPP (Endpoint Protection Platform), EDR (Endpoint Detection & Response), NDR (Network Detection & Response), and XDR (eXtended Detection & Response).
- Optimization of the security environment without impacting existing security solution architecture.

Industry- and Platform-Specific Support

- Tailored support for diverse industries, including enterprises, manufacturers, research institutes, energy, semiconductors, chemicals, IT services, healthcare, education, retail, and more.
- Threat detection and response services across various platforms, including PCs, servers, POS systems, mobile devices, OT/ICS, and cloud environments.
